

Variable Number	Variable Name	Variable Description	Variable Description	Variable Type	Variable Range
1	strain	strain of the mouse	N/A	categorical/nominal	c57bl/6j, balb/cj
2	sex	sex of the mouse	N/A	categorical/nominal	female, male
3	litter	identifier of mouse's litter	N/A	categorical/nominal	b15, b15, c12 . . .
4	age	age of the mouse	days since birth	ratio	20, 24, 32, 43, 71
5	tag	identifier of mouse	N/A	categorical/nominal	mouseID
6	trans1st10min	number of movements (transitions) among chambers in Social Approach Test (Phase 1)	number of transitions	ratio	0 to undefined
7	trans3rd5min	number of movements (transitions) among chambers in Social Approach Test (Phase 2)	number of transitions	ratio	0 to undefined
8	bothcyl.1st10min	time spent sniffing both cylinders in Social Approach Test (Phase 1)	seconds	ratio	0 to 600
9	nonsoc.3rd5min	nonsocial cylinder time in Social Approach Test (Phase 2)	seconds	ratio	0 to 300
10	soc.3rd5min	social cylinder time in Social Approach Test (Phase 2)	seconds	ratio	0 to 300

Variables are fully described in Fairless et al 2012 and Fairless et al 2011
